

Press release

‘Scan & Pay’ with Doccle: scan, pay, done!

Brussels, 8 December 2016 – On 8 December, Doccle is launching its Scan & Pay functionality. The upgraded Doccle app will make it possible to scan and pay all paper invoices using your smartphone. No more hassle with bank cards or card readers and no need to type in the amount and the structured remittance information (OGM-VCS).

Doccle, the free online platform that already allows users to receive, process and safely archive administrative documents from many different suppliers, is expanding its mobile app. The addition of ‘Scan & Pay’ now makes it even quicker and easier to pay. Thanks to the update, you can use your smartphone to scan and pay any paper invoice using the Bancontact app or your usual banking app. Anyone can use the app as registration is not required.

Fast, accurate scanning

Thankfully, you no longer need to type in the account number, structured remittance information (OGM-VCS) and amount. The Doccle app detects all the information needed to pay the invoice correctly on the transfer form (the “pink slip”), with no bank card or card reader required. It couldn't be quicker and also keeps all the information in one place. Users who have a Doccle account can now pay their invoices via Doccle, but people who don't yet have an account can use the function too. The Doccle app also logs all the payments in the history. This new functionality will make Doccle a handy platform for everyone and confirm its reputation as the most versatile administration tool in Belgium.

“Digital payment methods are becoming increasingly popular, but often impose restrictions”, says Bram Lerouge, Doccle's CEO. “We deliberately chose a solution which is accessible to everyone. The Scan & Pay functionality allows invoices to be paid from any account, no matter which bank you use. We don't require a standing order or direct debits, unlike many other platforms. That makes our solution unique in Belgium. The app allows you to pay and archive an invoice in just a few seconds.”

Doccle is once again using Bancontact for the payments made using this new functionality: “Payments are increasingly becoming part of the full customer experience, almost invisible. Thanks to the new ‘Scan & Pay’ functionality within the Doccle app, you can now pay any invoice in a flash using the Bancontact app. It's secure and simple, just like any other Bancontact payment. We are delighted that our collaboration has been expanded and hope all Doccle users enjoy a hassle-free payment experience”, says Kris De Ryck, CEO of Bancontact Company.

The updated Doccle app will be available free of charge from December for both Android and iOS devices, in the [App Store](#) and on [Google Play](#).

About Doccle

Doccle is an interactive platform that offers all your documents in one reliable, online environment. By listening and working closely with both individual users and professional partners, Doccle builds a better, more secure and even simpler solution every day. Doccle is therefore both a community and a platform that allows you to manage, process and archive all kinds of documents. With over 800,000 users, Doccle is the largest and most versatile administration tool in Belgium. Doccle is committed to being as accessible as possible for both private individuals and companies and will always be free. Alongside its users, Doccle's greatest strength lies in its partners, which include companies such as Telenet, KBC, Acerta, CM, UZ Leuven, water-link, Farys, Shéhérazade, De Watergroep, AVEVE, Van Breda Risk & Benefits, OLV Aalst, UZA, AZ Groeninge, ACV, Securex, Mechelen, Antwerp, Knokke-Heist, Codabox, Solidariteit voor het Gezin, KAVA, BAF, UCM, Watz, IWVA, VAB-Rijschool and the partners via eBox. Doccle is always looking for enthusiastic companies to strengthen its partner portfolio.
